Çağrı Bilginer

Computer Engineer
Koç University, Istanbul, Türkiye
+90-531-828-4838 cagribilginer.dev@gmail.com linkedin.com/in/cagribilginer github.com/cagribilginer portfolio

Education

Koç University İstanbul, Sarıyer
B.S. in Computer Engineering | GPA: 3.10/4.00 *2021 – 2026*
- Ranked 2,244th of 2.5 million candidates (top 0.1%) in the Turkish national university entrance exam (YKS).

Experience

Yapı Kredi Teknoloji Feb 2026 – Jun 2026
Software Engineer Intern *Çayırova, Kocaeli*
- Designed and built a new screen from scratch for a legacy leasing system modernization, using React/TypeScript on the frontend and Java-based backend services.

TEGSOFT Contact Center Softwares July 2025 – Sep 2025
Test Engineer Intern *İstanbul, Sarıyer*
- Wrote and executed functional and regression test cases for a contact center platform, validating core call and chat features across releases.
- Tracked defects in Jira and verified backend data integrity, working closely with developers to resolve issues.

IBTECH International Information and Communication Technologies Sep 2024 – Feb 2025
Software Engineer Intern *Gebze, Kocaeli*
- Replaced hardcoded values in a banking system's interface with dynamic JSON-based data handling – built the C# (XAML) frontend to capture and validate user input, and Java backend logic to process and fetch the corresponding data.
- Transferred to the Leasing department to help modernize a legacy system end-to-end: designed new screens, implemented features and bug fixes, and participated in code reviews.

Extracurricular Activities

Koç University Underwater Sports Club (KUSAS) | *Board Member* Jun 2024 – Jun 2026
- Organized scuba diving trips and events for students; completed SSI Divemaster training in Kaş.

Koç University Renewable Energy Community (KUREC) | *Team Member* Dec 2023 – Jul 2024
- Built and debugged STM32 embedded software for the gauge cluster and dashboard of a Teknofest Hydromobile vehicle.

Koç Ramses Ultimate Frisbee Team | *Player, Team Captain (2023-2024)* Sep 2021 – Jun 2024
- Competed in inter-university tournaments; team captain for the 2023-2024 season.

Projects

PocketPet | *Unity, C#* In Progress
- Solo mobile game project where players raise, customize, and care for their own unique virtual pet through real-time growth and interaction mechanics.

KUMap | *Flutter* kumap.hub.ku.edu.tr
- Cross-platform campus navigation app, published on Koç Hub and used by 1,000+ students, faculty, and staff.

ACTIVE | *Flutter, Swift, ARKit, AI*
- Built a Flutter travel app with a 4-person team: an AI travel companion plus a native Swift/ARKit layer for LiDAR-based AR occlusion and Google Geospatial API anchoring.

AidTrack | *PostgreSQL, Flask, React* aidtrack-system.vercel.app
- Built a full-stack emergency aid system: PostgreSQL schema (8 tables, 1,260+ rows of real FEMA data), a Flask REST API with analytical SQL views, and a real-time React dashboard.

EPL Predictor '26 | *Python, XGBoost, React, Tailwind* epl-predictor-2026.vercel.app
- ML match predictor (XGBoost) trained on team form, xG, and head-to-head history, with a React/Tailwind dashboard.

RokueQuest | *Java, OOP, Swing*
- Led a 6-person team building a Java/Swing roguelike; built procedural dungeons, combat, loot rarity, permadeath.

Skills & Interests

Programming Languages: C#, Java, Swift, Objective-C++, JavaScript/TypeScript, Python, Dart, C, HTML/CSS, VHDL
Game Development: Unity, C#
Frameworks & Backend: Flutter, React, .NET/XAML, REST APIs, JSON, Flask, SQL, PostgreSQL, Redis, Qdrant
Developer Tools: Git, GitHub, Docker, VS Code, Railway, Claude, Cursor
Methodologies: Agile/Scrum, Object-Oriented Programming (OOP), Microservices Architecture, Unit Testing
Certifications: Artificial Intelligence Track, Data Analytics Track (Koç University Specialization Programs)
Languages: Turkish (Native), English (Advanced), German (Beginner)
Interests: Video Games, Scuba Diving, Ultimate Frisbee, Photography, Basketball
